1. AP credit for Chem 20 or 21 is also acceptable.
2. See also the Physics requirements on [p.6](#).
3. Statistics Elective selected from the list of approved Statistics electives, found in [Appendix E](#).
4. ECE Concentration Elective: One course selected from the set of approved ECE Concentration Electives *from outside the Computer Engineering and Digital Systems area*. See [Appendix D: Approved ECE Concentration Elective Areas and Courses](#) for a complete course listing. For the ECE with COMPSCI second major, the four-course ECE Concentration requirement is satisfied by taking this one non-Digital Systems ECE Concentration elective in addition to three other courses built into the ECE with COMPSCI second major curriculum: ECE 350L, COMPSCI 310, and an ECE Digital Systems Elective.
5. ECE Elective: Any ECE course at the 300 level or above.
6. ECE Digital Systems Elective: One course from the Digital Systems area in the list of Approved ECE Concentration Area electives (see [Appendix D: Approved ECE Concentration Elective Areas and Courses](#)).
7. Approved ECE/COMPSCI Design Elective: Approved ECE/COMPSCI Design Elective taken after meeting all Math, Science, and ECE Core curriculum requirements. In addition, each approved design elective has one or more pre-requisite upper-level ECE courses. The elected design course may not simultaneously also count as an ECE Concentration Elective or ECE Elective. See [Appendix E](#) for a list of all currently approved Design courses.
8. The Natural Science/Engineering Elective may be satisfied by taking an upper-level (300-level or above) Natural Science/Engineering course, or by taking a course selected from a list of approved 200-level Natural Science/Engineering courses (check with DUS for approved list), found in [Appendix E](#).
9. COMPSCI Elective: Any COMPSCI elective at the 200 level or above.
